## POLYMER TECHNOLOGY SEMINAR 2011

This seminar has gathered outstanding and influential speakers in the industry.

The Director General of the Malaysian Rubber Board would be on hand to give an insight of the government support and policies in this important industry.

The President of the Malaysian Plastics Manufacturers' Association would also enlighten the audience on the challenges faced by the plastics industry and the opportunities available.

The technical papers lined up for this seminar would include the latest development in the rubber and plastics industries. Speakers would be on hand to highlight the usage of plastics in various sectors with the impact on the environment being given serious considerations. The latest development in the non-toxic processing oil being used in the rubber industry would also be discussed to address the restrictions placed on the export of such products to developed nations. To assist in the design of moulds, a paper on the latest development in computer simulation technology would be presented which would drastically reduce the development time and cost required from concept to production.
